EXPERIENCE

Full-Stack Developer Intern - Seedstages
Sept 2020 - Dec 2020

- Executed and contributed to full-stack development of a mobile application, with an emphasis on front-end features, robust back-end, responsive design and cross-browser compatibility.
- Worked on the migration from Firebase application to Django REST API.
- Lead the database team by conducting regular team meetings, monitoring the daily tasks and reporting the status to the manager.

Senior Test Engineer - Larsen & Toubro Infotech
Sept 2014 - Aug 2019

- Worked in Agile projects performing all Agile ceremonies.
- Subject Matter Expert (Go-To) for 8 Major applications.
- Involved in all the phases of Software Development LifeCycle (SDLC).
- Expertise in Functional Testing, Regression Testing, Smoke Testing and User Acceptance testing of the application.
- Performed Backend and Automated Testing for Web-based applications.
- Designed Test Plan, Test Scenarios, Test Cases and Test Reports for manual as well as automated testing as per the business requirements.
- Investigated overall Defect Management/Root Cause Analysis including tracking, logging and reporting bugs.
- Well versed communication with offshore as well as onshore team members to coordinate completion of the project.
